*Standard USB interface, storage support, copy file more secure.

Android Pad

Product Material : metal

Product Color : silver / blue

Product Capacity : 4GB / 8GB /
16GB / 32GB

Notebook Computer

Detailed description: This diagram illustrates the data transfer capabilities of the Karisma device. At the top, an Android smartphone and a tablet (Pad) are shown in circular frames. Red double-headed arrows indicate bidirectional data flow between these devices and the Karisma device. Below, a laptop (Notebook) and a desktop PC (Computer) are also in circular frames. Red double-headed arrows show bidirectional data flow between the Karisma device and these computers. The Karisma device is depicted as a blue and silver metal USB drive with a ring.

Card read

Data cable

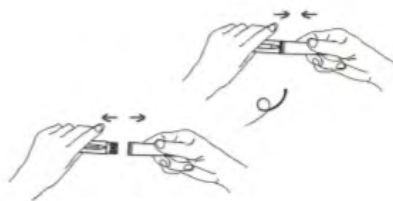

Detailed description: This diagram shows the Karisma device being used to transfer data from mobile devices to a laptop. On the left, a card reader and a data cable are shown with a large red 'X' over them, indicating they are not used. In the center, an Android phone and a tablet are connected to the Karisma device. A green arrow points from the mobile devices to the Karisma device, and another green arrow points from the Karisma device to a laptop on the right. Red lines connect the Karisma device to the laptop, showing the data path.
